Ramparts

June 7, 1968

Dear Mr. Weissberg,

Mr. Bensky has asked me to send you this latest issue of Ramparts, containing William Turner's article on the Kennedy and King assassinations. The article points to some striking similarities in both the details and the handling of the two cases and reiterates the call for the formation of a citizens' investigative committee.

The events of the last few days have underscored the need for such a committee. Mr. Bensky will be in touch with you very soon with more information on the commission.

Sincerely,

Jan Austin
